

HealthWeave

SEED ROUND · 2026

Your Lifelong Health Memory, Powered by AI

HealthWeave is the first AI-native Personal Health Intelligence Platform — unifying every medical record, biomarker, and health event into a living, reasoning knowledge graph.

THE PROBLEM

India's healthcare data is shattered into a million pieces

1.4 billion people. Thousands of hospitals. Zero continuity. Every patient starts from zero with every doctor.

Fragmented Records

Reports scattered across WhatsApp, paper files, CDs, and 10+ clinic portals. No single source of truth.

Zero Longitudinal Context

Each doctor visit starts blind. Patterns across 5 years of labs are invisible. Preventable conditions go undetected.

Reactive, Not Preventive

80% of healthcare spend happens in crises that could have been predicted 6-18 months earlier with trend data.

"I've had the same blood pressure problem for 3 years. Every new doctor asks me to repeat all the tests — as if I'm a brand new patient."

— RAMESH K., 54, BANGALORE (USER INTERVIEW)

Avg. time spent finding old reports

47 min

Duplicate diagnostic tests ordered

₹12,000/yr

Preventable chronic disease burden

\$53B/yr

CORE INSIGHT

Health data is not a storage problem. It's an intelligence problem.

The solution isn't another file cabinet — it's a reasoning engine that connects dots across time, substances, and systems.

Connected Biomarkers

Hemoglobin drops after antibiotics. Creatinine rises alongside BP spikes. HealthWeave sees these invisible threads.

Longitudinal Trends

A single HbA1c of 6.1% looks normal. Three consecutive readings trending up over 18 months is a warning signal.

Medicine Intelligence

Which medicine affected which biomarker, when, and how much — correlated automatically from your own health history.

Predictive Prevention

Detect metabolic syndrome, pre-diabetes, and cardiovascular risk 12-18 months before conventional diagnosis.

Biomarker Score

36 Month Health Trajectory

AI-detected anomaly + predictive trend — invisible to single-visit doctors

THE SOLUTION

HealthWeave: AI that knows your health better than you do

One platform. Every record. Lifelong intelligence. Built for India, ready for the world.

Health Timeline

Every test, visit, prescription on a unified visual timeline

AI Health Chat

Claude-powered RAG — ask anything about your own history

Correlation Engine

Automatic biomarker ↔ medicine ↔ symptom correlations

Predictive Alerts

Risk detection 12–18 months before clinical diagnosis

Doctor Summary

Pre-visit AI briefing — so every doctor knows your story

Emergency Passport

QR-code medical ID accessible by any ER, instantly

AI STACK

Claude claude-sonnet-4-6

Primary LLM

pgvector + RAG

Memory Layer

Vision OCR

Document AI

FastAPI + PostgreSQL

Backend

Medical Safety First

Every AI response includes mandatory medical disclaimer. All

Family Graph

Manage health records for your entire household

Smart OCR

Scan handwritten prescriptions & PDF lab reports instantly

From fragmented paper to living health intelligence

1. Capture

Photo, PDF, or manual entry —
prescriptions, lab reports,
discharge summaries

2. Extract

Claude Vision OCR extracts 40+
biomarkers, medications, dates
— even from handwriting

3. Reason

Correlation engine + prediction
engine surface insights, trends,
and alerts

RAG Chat Engine

Two-stage retrieval: pgvector semantic search +
PostgreSQL full-text search. Your AI doctor knows
your entire history and answers in plain language.

Correlation Engine

Auto-detects metabolic syndrome, medication
effects on biomarkers, and hidden correlations
across 36 months of data in milliseconds.

Health Scoring

Multi-dimensional health score (0–100) across 6
organ systems: cardiovascular, metabolic, renal,
hepatic, immune, and neurological.

MARKET OPPORTUNITY

A \$50B global opportunity anchored in a \$8.6B India market

Digital health is the fastest-growing segment in tech, with India at the epicenter of the next wave of growth.

TAM — GLOBAL DIGITAL HEALTH

\$50B

by 2027 · CAGR 15.8%

SAM — INDIA DIGITAL HEALTH

Market Drivers

- ABDM (Ayushman Bharat Digital Mission) — Govt. mandate for digital health records
- Smartphone penetration: 800M+ devices, 5G rollout accelerating
- COVID-19 accelerated digital health adoption by 5 years
- Rising chronic disease burden: 77M diabetics, 200M+ hypertensive

Revenue Opportunity

B2C Premium		₹299/mo
B2B Hospital		₹50L/yr
B2B Insurance		₹2 PMPM
API Platform		\$0.05/call

TRACTION

Built, deployed, and validated in production

What's Live Today

- Complete user auth + family graph management
- Smart OCR pipeline: Claude Vision → structured biomarkers
- Two-stage RAG chat engine (pgvector + full-text search)
- Health scoring across 6 organ systems (0–100)
- Predictive alert engine with risk categorization
- Emergency QR Passport (public, no-auth endpoint)
- Doctor pre-consultation AI summary generator
- Medicine intelligence + biomarker correlation engine

"The system correctly identified a pattern between my iron supplements and ferritin levels that 3 doctors had missed over 2 years."

— BETA USER FEEDBACK

Three revenue streams.

One platform moat.

Freemium consumer base feeds premium B2B data insights. Network effects increase switching cost with every record uploaded.

B2C Consumer

₹99–₹499/mo

Free tier + Premium tiers

- Basic: 10 records, 5 AI queries/mo
- Pro: Unlimited + family (5 members)
- Premium: API access + priority AI

B2B Healthcare

₹25L–₹75L/yr

Hospital & clinic licensing

- Hospital EMR integration module
- Population health dashboard
- Pre-consultation AI summaries for doctors
- Anonymous aggregate insights & benchmarks

B2B Insurance

₹2–₹5 PMPM

Per-member-per-month SaaS

- Risk stratification for underwriting
- Preventive care incentive programs
- Claims fraud detection signals
- Wellness program engagement

Path to Profitability

COMPETITION

We don't compete with apps.
We make them obsolete.

Existing players are document managers. HealthWeave is a reasoning engine.
Fundamentally different product category.

FEATURE	HEALTHWEAVE	ABHA / DIGILOCKER	PRACTO / 1MG	APPLE HEALTH	EPIC MYCHART
Document Storage	✓	✓	✓	✓	✓
AI-Powered Chat	✓	✗	Partial	✗	✗
Biomarker Correlation	✓	✗	✗	✗	✗
Predictive Alerts	✓	✗	✗	Basic	✗
OCR from Photos	✓	✗	✗	✗	✗
Emergency Passport (QR)	✓	Basic	✗	✗	✗
Doctor AI Summary	✓	✗	✗	✗	Basic
Family Graph	✓	✗	Partial	✗	✗
India-specific (vernacular labs)	✓	Partial	Partial	✗	✗

HealthWeave is the only platform that correlates, predicts, and reasons — not just stores.

Four compounding moats that deepen with every user

Data Moat

Each uploaded record trains our medical ontology and India-specific biomarker reference ranges. Proprietary dataset of Indian lab name aliases (40+ dialects) that no competitor can replicate without years of data collection.

Proprietary Dataset

Network Moat

Family graph creates multi-user lock-in. When a parent, spouse, and two children are all on HealthWeave, leaving means losing your entire family health network. Social sharing of health milestones drives organic growth.

Viral Coefficient

Time Moat

The longer you use HealthWeave, the more valuable it becomes. After 3 years of records, the correlation engine has 36x more signal than month 1. Switching cost grows geometrically — your history is irreplaceable.

Distribution Moat

Hospital partnerships create institutional lock-in. Once 50 hospitals use our Doctor Summary API, their patients will naturally use HealthWeave. B2B distribution creates thousands of B2C users per partnership.

Hyderabad → Bangalore → India. Hospital-led consumer acquisition.

1

PHASE 1 · Q1-Q2 2026

Hyderabad Pilot — 3 hospitals, 500 users

Partner with 3 mid-sized multispeciality hospitals. Doctor summary API integration. Patient onboarding at discharge. Target: 500 active users, NPS > 60.

2

PHASE 2 · Q3-Q4 2026

South India Expansion — 20 hospitals, 10K users

Bangalore, Chennai expansion. Insurance company pilots. App store optimization + influencer health creator partnerships. Target: ₹10L MRR.

3

PHASE 3 · 2027

Pan-India — 100 hospitals, 100K users

Series A raise. Mumbai, Delhi, Pune. ABDM integration (Ayushman Bharat Digital Mission). Insurance API partnerships. Target: ₹1Cr MRR.

4

PHASE 4 · 2028

Southeast Asia + Middle East

Singapore, UAE, Malaysia. Diaspora Indian population. Series B. Platform APIs for third-party health app developers.

Acquisition Channels

Hospital Partnership Value Prop

- ✓ Pre-consultation summaries save doctors 8 min/patient
- ✓ Post-discharge patient engagement reduces readmission
- ✓ Analytics dashboard shows department-level health trends
- ✓ Revenue from co-branded HealthWeave subscriptions

Conservative path to
₹10Cr ARR in 24 months

Bottom-up model driven by hospital partnerships (B2B anchor) + freemium consumer conversion.

Revenue Projection (₹ Crore ARR)

YEAR 1 TARGET

₹30L ARR

500 users · 3 hospitals

YEAR 2 TARGET

₹1.2Cr ARR

10K users · 20 hospitals

YEAR 3 TARGET

₹10Cr ARR

100K users · 100 hospitals

KEY ASSUMPTIONS

- 2% freemium → paid conversion
- ₹75L/yr average hospital contract
- 25 patients/month/hospital onboarding
- 60% gross margins at scale (AI cost efficiency)

THE ASK

Raising **\$1.5M Seed Round** to capture the market window

12 months of focused execution to prove hospital-led B2B2C model and hit Series A metrics.

Team (40%)

\$600K — Senior AI/ML engineer, backend lead, mobile engineer, medical advisor

\$600K

Hospital Partnerships (20%)

\$300K — Integration costs, medical advisory board, regulatory compliance (DPDP)

\$300K

Product & Mobile (20%)

\$300K — Native iOS/Android apps, offline capability, WhatsApp bot integration

\$300K

GTM & Operations (20%)

\$300K — Sales, marketing, infrastructure, legal, compliance, working capital

\$300K

SERIES A MILESTONES (12 MONTHS)

- ₹1.2Cr ARR (10 hospital contracts signed)
- 10,000 active premium consumers
- NPS > 65 from patient & doctor cohorts
- DPDP compliance certification complete
- Mobile apps (iOS + Android) launched
- Insurance company pilot agreement signed

Target Series A (18 months)

\$2-12M

THE TEAM

Builders who understand healthcare from the inside

A rare combination of deep AI engineering, clinical domain knowledge, and enterprise go-to-market experience.

Tridib Goswami
Founder & CEO

AI architect with 10+ years in enterprise software. Built HealthWeave MVP solo in 8 weeks using Claude AI. Deep expertise in RAG systems, vector databases, and clinical data architecture.

Open · CTO
Hiring: ML / Backend Lead

Seeking: 5+ yrs ML engineering, FastAPI + vector DB experience, passion for healthcare AI. Competitive equity + salary package. Funded role in seed round.

Open · Medical Advisor
Hiring: Clinical Partner

Seeking: MD/MBBS with digital health interest. Hospital dept head preferred. Advisory equity + patient engagement for pilot site. Clinical validation of AI outputs.

Advisory Board (Target)

- ◆ Ex-AIIMS / Apollo CMO for clinical credibility
- ◆ IIT / IISc AI professor for research validation
- ◆ ex-PhilipsHealth / Practo exec for GTM strategy
- ◆ DPDP / HIPAA compliance legal expert

Why We Win

- ✓ First-principles AI architecture — not prompt wrappers
- ✓ India-specific medical knowledge built in (not bolted on)
- ✓ Hospital GTM strategy from day one — not pivot
- ✓ Full-stack from OCR ingestion to predictive intelligence

Every human on Earth deserves a lifelong health companion that never forgets.

In 2035, HealthWeave will prevent more chronic diseases than any hospital system in Asia — not by treating illness, but by making it predictable, and therefore preventable.
